Please remember to return all the radios to the office at the end of each day.

Reminder that the mentor/mentee meeting will begin in Mrs. DeLuca's class at 2:40

2019/2020 Recycling Update

Hello staff! **Thank you to all who take the time to include recycling in your daily classroom** routines as well as at home! This year due to the large quantity of recycling generated here and the big changes in the guidelines for what is being accepted at our local BCEP, we are making some changes to the recycling routine here @ BES.

Sooo...in an effort to streamline and simplify the process we are going back to our original plan of **each classroom managing their own recycling this year.** Most classrooms have job lists already and hopefully this can go on your list! **Please separate** your recyclables **into two bins**. One bin for **only "clean" mixed paper** (NO glue, paint or food wrappers, also NO waxed, foil or plastic coated paper) and one bin for **clean & empty #1 & #2 plastic bottles (ONLY)! All other plastics belong in the trash**! No wish recycling please! Also, if you have corrugated cardboard boxes they can be flattened & placed by your trash can for recycling.

Only clear trash bags are used for recycling and will be located in the Staff break room, with more in Rayno's room. The paper should be bagged separately from the plastics. It is very important with the new restrictions, that the plastic should be limited to empty & "clean", #1 & #2 bottles. Please make sure the bags are tied shut and they can be placed outside of the gym doors, to the right towards the dumpsters. Or if you have older students they could deposit the clear bags in the far LH door of the dumpster (labeled recycling:). If you could combine with a neighbor classroom or grade level to conserve bags that would be great too.

Also, some cleaned recycling bins are available for classrooms that still need them Or if you have your own bin that fits better in your space, any container will do as long as you use the clear bags. But if you need a bin (or 2) please email Terese@ tbugieda@mybes.org

For the A wing, there are large bins for each, paper and plastic, at the end of the wing to make it easier for for our youngest students.

We will also have some of our older students from Recycling Club continuing to help with collection in the common areas but any help getting the recycling out is appreciated! Please take a moment to review the new recycling guidelines with your students. Any questions, comments or concerns please contact Terese Bugieda or Matt Rayno.

Thank you for taking the recycling challenge & think green!

BES RECYCLING GUIDELINES

UPDATED 2019

Here are all the things we recycle at BES and how you can help!

- **CORRUGATED CARDBOARD BOXES**-please flatten and leave by trash cans by your classroom door

- **PLASTIC BOTTLES**-use GREEN BINS & make sure containers are empty & clean & are #1 or #2 plastics **-No Styrofoam please!**

- **PAPER**-use BLUE BINS for any clean paper **-No glue or paint please!**

The 7th & 8th grade Green Team will be collecting plastic and paper on Fridays in the common areas ONLY! There are also green hex collection bins around the school and by the gym for **clean & empty #1&#2 plastics only** for recycling.

Remember, there are over five hundred of us here five days a week! **TOGETHER we can make a BIG difference!**

If you have any questions or ideas for the Recycling Club or if you need a bin, please contact Mr. Rayno or Mrs. Bugieda.

Thank you to all who take the time and make the effort to RECYCLE :-)

Upcoming Events
