

## INTERSCHOLASTIC ATHLETICS

The School Board believes individual students will benefit through opportunities to grow physically and intellectually through their experience in self-discipline and their contribution to team effort made possible through competitive interschool and intramural team and individual sports activities.

It is the Board's policy to provide interscholastic athletic competition in a variety of sports. Students shall be allowed to participate in school sponsored sports on the basis of their physical condition and desire. Qualified personnel should be provided for coaching and supervising such programs. In addition, it is the policy of the Board to provide intramural athletic activities as an outgrowth of class instruction in physical education and commensurate with the grade level of the students involved.

The purpose of school athletics is both educational and recreational. The athletic program should encourage participation by as many boys and girls as possible and should be carried on with the best interests of the participants as the first consideration. This should be done without unreasonable interference with other obligations in the school community.

It is recognized that a well-organized and well-conducted athletic program is a potent factor in the morale of a school student body and an important phase of good community-school relations. Too great an emphasis on winning contests or too consistent a record of losing them are both harmful to the development of good attitudes among students and the public.
